STOP!!! Don't Call Any Electrician Until You Read This First!

The Fact is, all electricians are not the same.

Some electricians are not trained to work in your home or certified to perform the work to meet your needs. At Bruder Electric our electricians receive extensive training before they are allowed to work in your home. Our electricians are trained to meet your needs foremost, other electricians are just worried about getting the job done and not caring about the customer.

Make sure that your home will be protected.

A lot of electricians are used to working on construction sites where neatness is not an issue. Our electricians are trained to work in your home and protect your investment. We are so committed to this that we guarantee that your home will be as clean or cleaner when we leave your home or you do not pay for the work.

How safe are you with the electrician in your home?

Cases of contractors assaulting homeowners is dramatically on the rise. You need to be sure that whoever is entering your home that you and your family are safe. Bruder Electric only hires electricians after they pass extensive background checks and drug tests. So we hire exactly the kind of experienced drug-free professionals that you want in your home.

You must know how much the electrician is going to charge before the work begins.

Most electricians still charge by the hour, leaving you with an open ended bill based on how long it takes to do the job and the need for trips to the supply house, etc. At Bruder Electric our technicians will present you with the exact amount of the job for your approval BEFORE we begin the work. Your investment amount will not change even if the job takes longer than it should.

We guarantee a complete and enjoyable service experience.

At Bruder Electric you will always talk to a live person when you call. Our electricians are fully uniformed and will give you the RED CARPET TREATMENT when we arrive at your home. We back all this up with a 100% satisfaction guarantee.
